Sponsorship benefits

Why should your company sponsor our society? Even though there are numerous benefits gained from this partnership, we have summarised the top 5 in the list below.

5. Great student engagement rates

CSS is one of the largest departmental societies in the Engineering and Physical Sciences (EPS) college. In 2017-2018, we reached a total of 224 members. As the end goal for this year, we plan to raise even more awareness of the opportunities offered by the society. Furthermore, the attendance rate of our events has grown over the years, as we started to target all available social media channels and make use of our strong bond with the School board. The annual CSS ball had more than 90 members attending, while the CSS BBQ reached a turnout of 80 members in 2016-2017. The new EPS-award nominated Tech Talk series saw packed rooms throughout the year - almost 80 students attended the event!

4. Showcase cutting-edge technology

You will have the chance to demonstrate any technologies that your company uses by sponsoring tech talks, hackathons or other type of competitions. Additionally, the CSS hardware lab can be used throughout the events! This means that you can engage with the UoB tech community in a fun and creative way, while showcasing tech capabilities of the company.

3. Opportunity to recruit top individuals

UoB's School of Computer Science is one of the top 15 departments in the UK. This means our members are amongst the brightest STEM students in the country - as a CSS sponsor, you will thus have the opportunity of promoting company recruitment schemes to highly skilled individuals. Previously, numerous students have applied and successfully gained positions in summer programmes or graduate schemes run by companies who have engaged with them throughout the year.

2. Promote your company to a diverse group of students

Diversity is key in any company that wants to keep a competitive edge in the tech industry. As a society, CSS massively encourages this initiative - our efforts include adding a Diversity Representative position as part of our committee in 2016. Furthermore, our members form a truly diverse group - from several nationalities (Indian, Chinese, Japanese, Romanian, Bulgarian, Lithuanian and many more) to four different year groups and reaching over 40 female members out of a total of 224 last year!

1. Most importantly... sponsor an award-winning society!

Our hard work has been recognised through distinguished EPS awards for several years, thus rewarding our commitment and passion for offering CSS members a unique university experience. You will be sponsoring a society that has ultimately brought the feeling of 'belonging to a family' in the Computer Science department. A society that actively works towards improving and growing each year through diversifying events and bringing in opportunities that benefit both our members and the local tech community.

Awards

Our efforts have been recognised through the awards mentioned below:

- Society of the Year, 2016-2017
- Outstanding Event Award for Hack The Midlands, 2017
- Outstanding Event Award for Women In Technology Conference (joint award with WISE, the Women In Science & Engineering society), 2017
- Inspirational Committee Member for Jack Wearden, CSS President in 2015-2016.

We have also been shortlisted for the following awards:

- Committee Member for Tom Goodman, CSS President in 2016-2017
- Industrial Award for Tom Goodman, CSS President in 2016-2017
- The Great Achievement in EPS Award for Tom Goodman, CSS President in 2016-2017
- Outreach Award for CSS, 2017.

Sponsorship Tiers

	Bronze (£500)	Silver (£1000)	Gold (£1500)
Logo on all CSS promotional material (exc. stickers)	✓	✓	✓
